SALE INFORMATION

STARTING TIME: 11.00 am

VENUE: This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to Sale Day.

Presale Inspection Afternoon

Friday 30th August 1:00pm to 4:00pm

At 184 Steeles Lane, Mortlake.

Sale day inspection from 9.00am, Friday 6th September.

CATERING: Light lunch will be available.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

SEMEN RETAINED:

Banquet will retain semen from some of the bulls in this Sale for within herd use or progeny testing. These bulls will be nominated on the supplementary sheet.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

SALE INFORMATION

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 6 herd.

See page 37 for our National Cattle Health Declaration.

STOCK HEALTH:

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen Branson - 0419 884 839
Noeleen Branson - 0437 029 992
Hamish Branson - 0427 164 031
Email: banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

Sire: WATTLETOP MOONSHINE M42

Wattletop Dandloo K48

Black Aqua Lucifer L15

DAM: ANVIL EMBLYNETTE P177

Anvil Emblynette E199

Rocket R160, was featured in our Autumn 2022 Sale and sold for \$40,000. He was admired for his strength of head, length of body, increased capacity, big hindquarter, depth of flank and fine soft skin. His Sire, Moonshine M42, was long, fine fronted and soft skinned. We have already used 10 sons of Moonshine. Dam of R160, Emblynette P177, was purchased as an outstanding calf at foot at the Anvil Dispersal, she is proving to be an outstanding introduction. Her first group of four E.T sons were exceptional. One son, Statesman S154, was retained for stud use. The other three sons featured in our Autumn 2023 Sale selling for \$40,000, \$34,000 and \$20,000. Two of these sons have been used in AI. A maternal half sister to P177 joined our E.T program last year. 4 sons will be offered in this Sale.

DAM: BANQUET YENDI N453

Banquet Yendi K245

Quiver Q211 is one of the Moonshine M42 sons we retained from our 2019 drop. His sire, Moonshine M42 was purchased with Quarterway Angus, Tas. He is breeding exceptional daughters for their superb udders, sound structure and are fantastic workers. Moonshine sons have sold to \$40,000. Dam of Q211, Yendi N453, is a full sister in blood to Nuttella N462. They are both by J507 and their dams are flush sisters. All K245's sons have made our sales and sold to \$28,000. Quiver Q211's first sons featured in our Autumn 2023 Sale and sold to \$24,000 another son in our Spring 2023 sale sold for \$24,000. Like his sire, Quiver is breeding magnificent daughters. We have several daughters selected to join our E.T program this spring. 5 sons will be offered in this Sale.

DAM: BANQUET YENDI K224

Banquet Yendi D351

It is the consistency of the progeny of Nuttella N462 that has us so excited. Bulls that produce consistent lines of progeny are so much more valuable. N462 consistently improves so many traits. He adds thickness, depth and do ability to his progeny. He also improves structure and temperament. We rate Nuttella as the best sire we have used at Banquet. N462 sons achieved top price at our Autumn 2022 Sale at \$62,000 to Glenloch and Quarterway Angus, TAS and second top price of \$60,000 to Moorunga Stud. In our Spring 2022 Sale his son topped the Sale at \$65,000 to Mountain Valley Angus, NSW. A Nuttella son topped our Spring 2023 Bull Sale at \$42,000 to Londavra Angus, Tas. Nuttella sons were also a feature at our Autumn 2024 Bull Sale when 20 sons were sold and topped at \$40,000 to Lunar Brangus and Ultrablacks, QLD. Nuttella's daughters are also very attractive for their thickness, softness and do ability. 7 sons will be offered in this Sale.

Hingaia 469

DAM: BANQUET JULIE W164

Abbaringa Julie L10

S020 is a very special genetic package. His sire, Jamberoo J507, has been a favourite at Banquet since his first calves arrived in 2016. He has sired 171 progeny at Banquet to date and includes Nuttella N462, our top sire, and Privilege P357, a sale topper at \$27,000 to Toora West. Julie W164, dam of S020, is a legend at Banquet. When she died sitting up in the paddock at 18 years, she had produced 50 calves at Banquet. Her top 11 sons averaged \$17,500. One son National N278, sold for \$48,000 to Toora West. One daughter Julie N291, is still in or E.T program. S020 was used over stud first calvers before selling in our Spring 2022 Sale for \$26,000 to Todd and Jo O'Sullivan. 7 sons will be offered in this Sale.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 14 to Lot 24 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV's of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

Undo U113 is a special young bull to start the offering of "Heifer Bulls". His sire Moonshine M42 has produced many stud sires including Quiver Q211 and Rocket R160. His dam, Dream G13, is a magnificent, powerful, thick and easy doing female. Her first 10 sons featured in our Autumn 2024 Sale, topping at \$40,000 and averaged \$25,000. With a pedigree like this, it is no surprise that U113 is long, smooth shouldered, clean skinned and very stylish. A young bull that should breed lovely daughters. Flush brother to Lot 10, half brother to Lots 2, 3, 6, 7 and 9. Semen retained. Should be suitable for joining maiden heifers.

Unfold U045 is similarly bred to the previous lot, being a grandson of Moonshine. His sire, Quiver Q211, was our favourite "Heifer Bull" to keep from the "Q" drop. We have a couple of Q211 daughters selected to flush this spring. U045's dam, Quiet S090, is also very well bred by the super sire Nuttella N462 and traces back to the legendary Quiet Y091. Unfold is the first grandson of Nuttella to be offered. U045 is powerful, rugged, muscular, wide topped with a lot of bone and grunt. He is very impressive when he was born at 34kgs out of a maiden. U045 will grow into a lot more than a heifer bull. Semen Retained. Should be suitable for joining maiden heifers.

 WITHERSWOOD KERRY D8^{SV}

It is rare to have a complete outcross offered at Banquet. U79 and his dam, Kerry S19, were purchased from the 2023 Millah Murrah Female Sale for \$44,000. We attended the female sale to select a top donor female from a great old cow family. We have always admired the Witherswood Kerry family. When accessing the females at Millah Murrah, Kerry S19 and her three flush sisters stood out to us, they had style, volume, powerful heads and great udders. Kerry S19 joined out ET program last year. Uptake U79 is moderate, easy doing, soft and strong spined.

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.
 SV : the sire has been verified by DNA.
 DV : the dam has been verified by DNA.
 # : DNA verification has not been conducted.
 E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

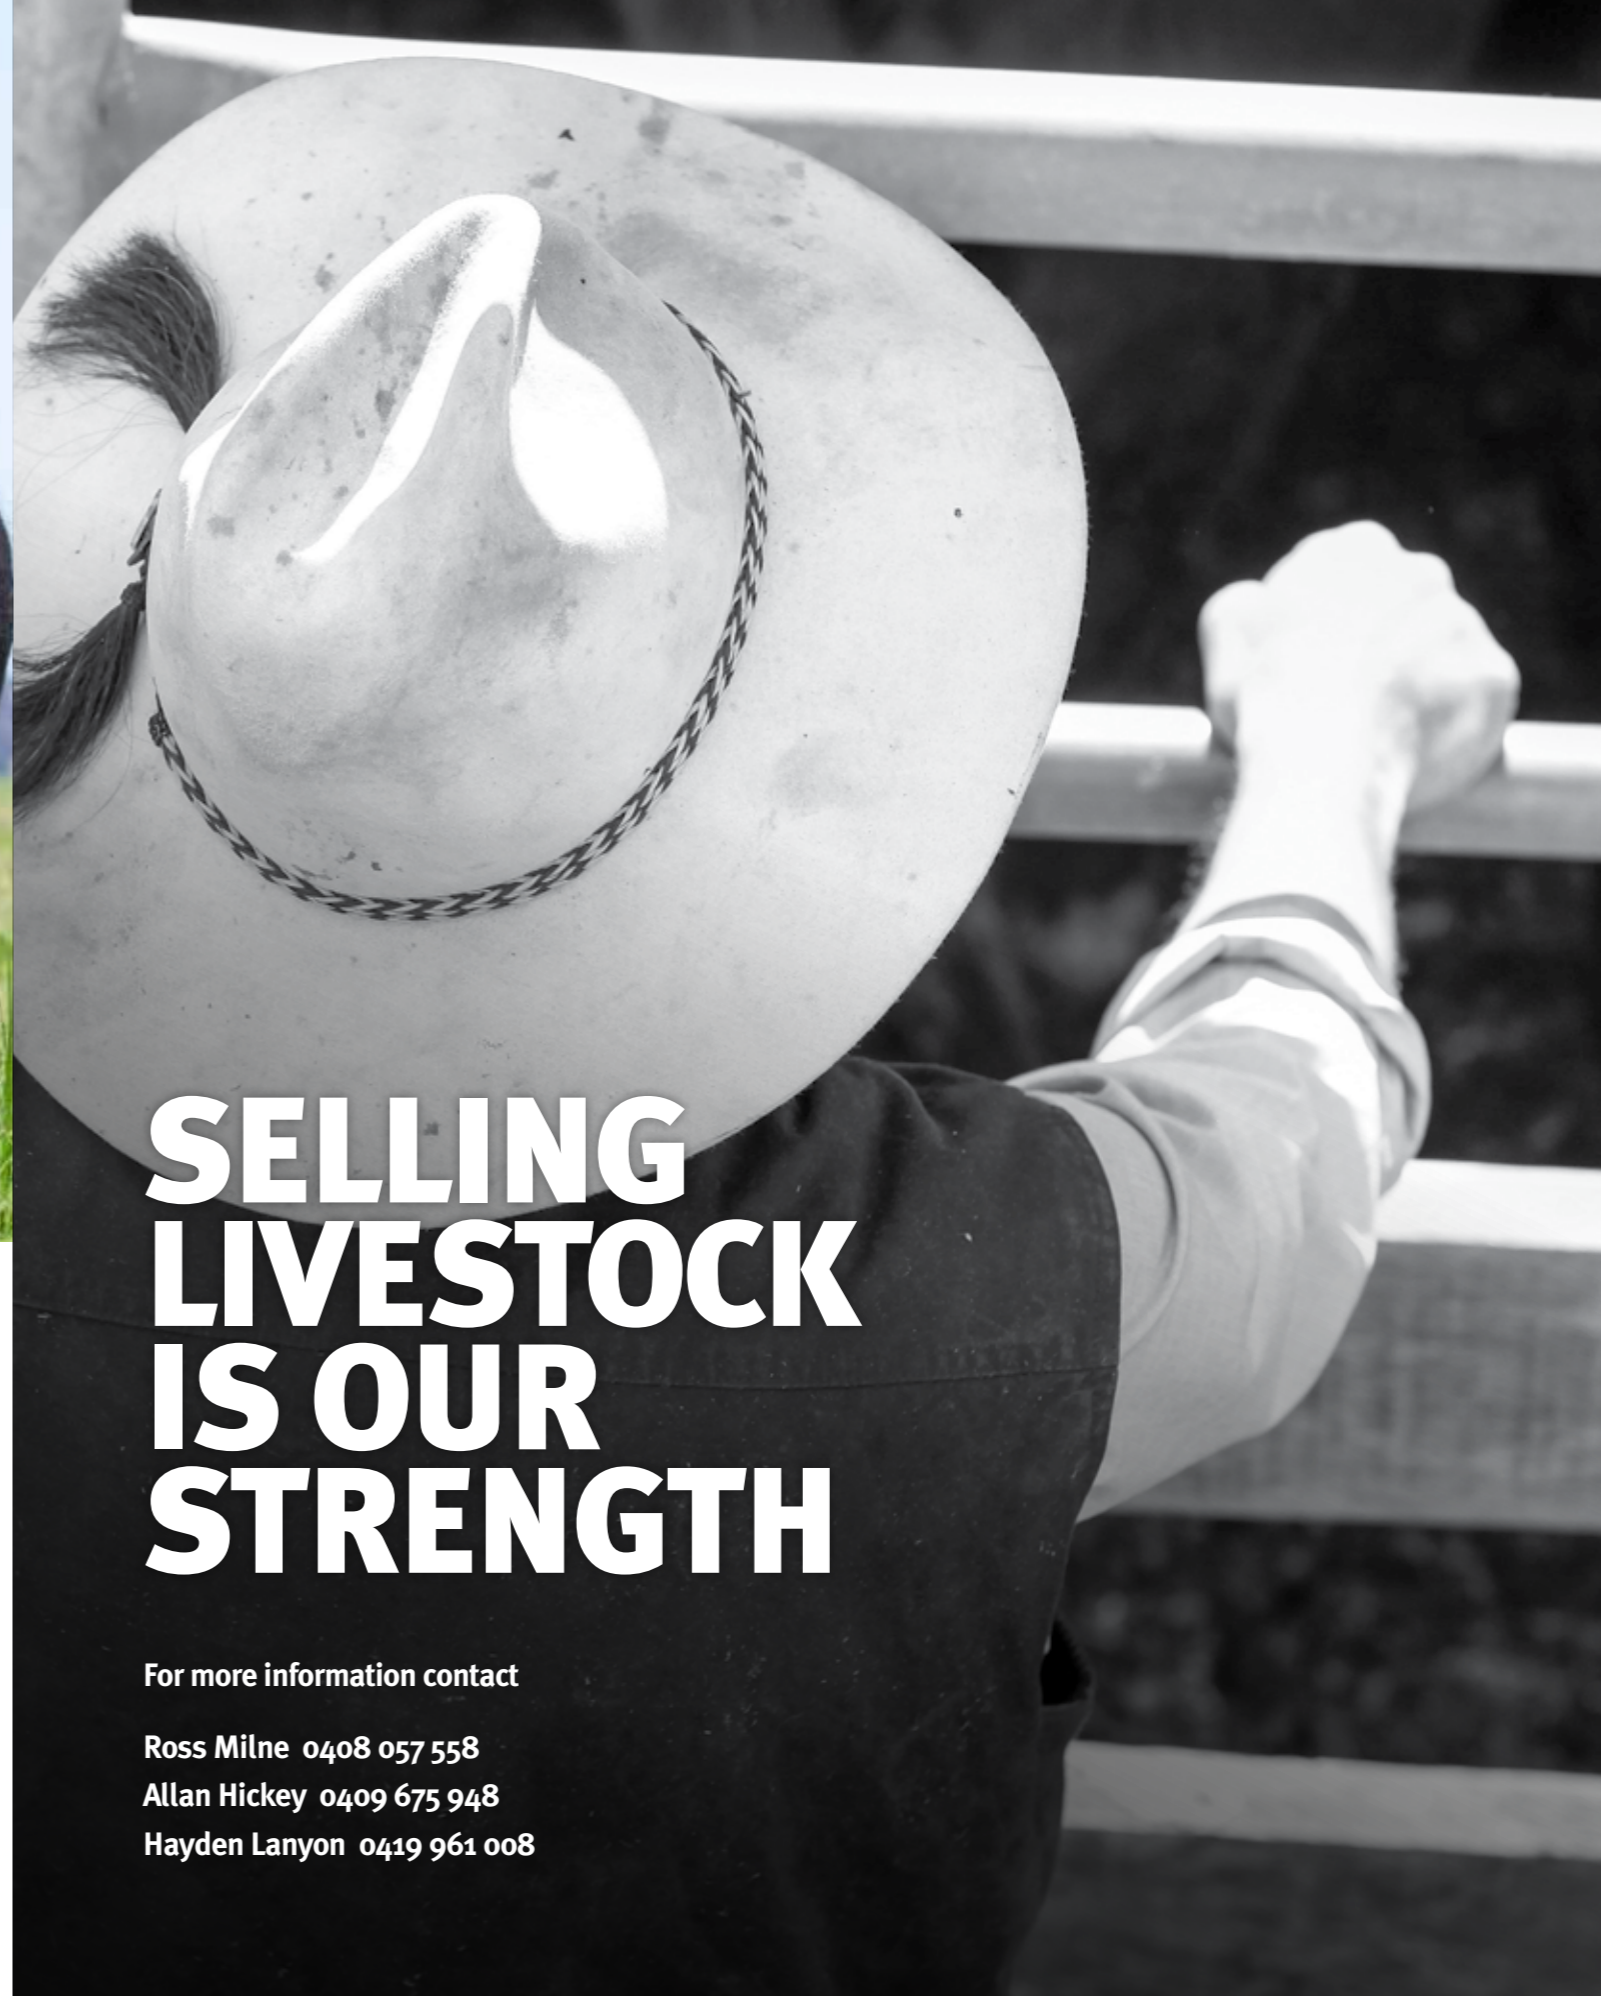

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Biosecurity and health information

- Has the owner stated above owned all the cattle in this consignment since birth? Y N
- Does the property of origin have a completed on-farm biosecurity plan? Y N
- Have these cattle been tested for the presence of pestivirus antigen? If tested, were any cattle found to be persistently infected? Y N
Y N
- Have these cattle been tested for the presence of pestivirus antibody? If tested what percentage of the tested cattle were antibody positive? Y N

Has the property of origin had an occurrence of clinical Johne's disease (JD) in any species in the past five years? Y N Unsure

J-BAS of Six (Optional)
 Y N Unsure

On the property of origin, have cattle been co-grazed with dairy cattle? See explanatory note for advice on co-grazing with non-bovine species
 Y N Unsure

Has the source herd had a JD test? Y N Pending
 If so, which test? Check Test Sample Test Date 26 / 6 / 18
 Was the result negative? Y N

If dairy cattle, the consignment has a Dairy Assurance Score of: Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)

Any other relevant health information

Treatments

Treatment type	Product	Date of treatment within last 6 months
Drench or pour-on	Dectomax	August 2024
Liver fluke		
Other treatments	7 in 1, AD&E, Multi Min Evolution Vibriovax, Pestiguard	August 2024 August 2024

Current vaccinations for the cattle being moved (see explanatory note)

Clostridial (e.g. 5 in 1): Y Botulism: Y

Leptospira (e.g. 7 in 1): Y Bovine ephemeral fever: Y

Pestivirus: Y Tick fever: Y

JD (Sillirum): Y Vibrio: Y

Other vaccinations (specify):
